

TITLE: MASKS

COUNTRY: CATALONIA (SPAIN)

DATE: May 2018

Duration and involved people: We spent two hours. When teachers arrived at school we split in two groups and some of them painted a wall in the playground of the school. And some other teachers painted some masks.

Objectives:

Test creative teachers skills.

Explore hidden creativity through exciting elements of masks.

Create beautiful masks with the guidance of everybody and try to bring out new archetypes of designs.

Methodology:

We had a look at different examples of masks related to flags of different countries. Then we provided all the materials and the first part of the workshop was focused on sketching the design of each mask and then crafting it using the materials and tools provided. They all of them were awesome!

Achievements:

Apart from sharing ideas, it was a good pleasure to have almost all the teachers working there. Everyone learnt from the others. But the important point wasn't just creating one's mask, but also creating good feelings with people around us.
