

TITLE: INTRODUCING OUR SCHOOL TO THE BULGARIAN STUDENTS

COUNTRY: BULGARIA

DATE: May 2017

Duration and involved people: This workshop was done the first year of this Erasmus project and it took one hour to do it. It was done with students of ?? years old

Objectives:

To introduce our school, its situation, the implementation of the educational system, the language we speak, the flag, some curiosities about the country...

To share with students our reality while developing basic skills using innovative methods.

Methodology:

First we introduced our school to the Bulgarian students with the support of the following prezi. There you will get some information about us:

https://prezi.com/r-kzjn86uq5i/?utm_campaign=share&utm_medium=copy

Later on we did an activity using Socrative about what we had explained. The main function of this Socrative was to test and check if students had understood our introduction.

Achievements:

Students followed all the presentation carefully, they asked some questions and doubts they had related to the topic we had been talking to and then they did the activity of Socrative very well. So we can say they achieved the main goal.
